

Goal 1: Working at IBM

AI & Data Science Specialized Diploma Student

S

My goal is to secure a position at IBM in the field of AI or Data Science, applying the skills I'm learning in my specialized diploma.

M

Tracking progress by completing diploma projects, building a portfolio, earning IBM certificates, updating my CV/LinkedIn, and applying to IBM programs.

A

IBM offers many opportunities for early-career AI and Data Science talent, making this target realistic.

R

This matches my passion for AI, data, and innovation, and aligns with my long-term career vision.

T

A 9-month plan aligned with my diploma, followed by continuous applications and interview preparation.

Goal 2: Maintaining Good Health & Building a Consistent Fitness Lifestyle

S

My goal is to maintain good physical health by following a balanced lifestyle that includes regular exercise, healthy eating, and better daily habits.

M

I will track my progress through weekly workout sessions, improved energy levels, weight or muscle measurements, sleep quality, and consistency in healthy meals.

A

This goal is achievable through simple routines like 3–4 workouts per week, balanced meals, drinking more water, and reducing unhealthy habits.

R

Good health improves my focus, productivity, mood, and overall performance—both personally and professionally.

T

I aim to establish a consistent routine in 3 months, maintain it for 6 months, and turn it into a long-term lifestyle.

Goal 3: Building My Own Side Business

S

My goal is to start my own side business alongside my main job—something that aligns with my skills, interests, and market needs.

M

I will measure progress by researching a business idea, building a simple plan, setting revenue targets, creating branding, and tracking monthly performance.

A

A small, manageable side business is realistic with proper planning, online tools, and consistent time investment every week.

R

Having a business gives me financial independence, creativity, and long-term stability beyond my full-time job.

T

I aim to validate an idea within 2 months, launch a basic version in 4–6 months, and start generating income within 9–12 months.

Goal 4: Teaching Others What I Learn

S

My goal is to teach others what I learn—especially in AI, Data Science, and technical skills—through sessions, content, mentoring, or helping beginners.

M

I will track progress by creating learning materials, delivering small sessions, helping individuals, posting educational content, and receiving feedback.

A

Teaching even one or two people at a time is realistic, and I can start small through social media, study groups, or volunteering.

R

Teaching reinforces my own understanding, builds my communication skills, and allows me to give back and support others.

T

I plan to start sharing knowledge within 1–2 months, deliver my first session within 3–4 months, and continue consistently afterward.
