

Task 1 : Time Management

#	Time Waster	How to Overcome It
1	Excessive phone usage	Set specific times to check your phone and use focus or “Do Not Disturb” mode
2	Lack of clear priorities	Start each day by identifying your top 1–3 important tasks
3	Multitasking	Focus on one task at a time to improve efficiency and quality
4	Unplanned meetings	Schedule meetings with a clear agenda and defined time limit
5	Procrastination	Break tasks into small, manageable steps and start with the easiest one

Task2

Stress Over Three days

Day	What Triggered It?	How Did I Respond?	What Helped?	What Could I Try Next Time?
Day 1	Tight deadlines and multiple tasks at the same time	Felt overwhelmed and rushed through tasks	Writing a priority list and taking a short break	Start the day with clear priorities and time blocking
Day 2	Unexpected changes and last-minute requests	Became anxious and lost focus	Deep breathing and stepping away from the screen	Build buffer time into my schedule
Day 3	Long working hours with little rest	Felt mentally exhausted and less productive	Taking a walk and disconnecting from work	Schedule regular breaks and set clear work boundaries

Task 3

Action Plan

Objectives (Goals)	Tasks (What you need to do)	Success Criteria (How you measure success)	Time Frame	Resources (Who/What helps)
Become a proficient data scientist	Study Python, statistics, and data analysis fundamentals	Ability to clean, analyze, and visualize datasets independently	3–6 months	Python, Pandas, NumPy, Matplotlib, DataCamp
Gain machine learning & AI skills	Learn ML & DL concepts and apply them in projects	Build and evaluate ML models with good performance	6–9 months	Coursera, AI & ML courses, Scikit-learn, TensorFlow
Specialize in genetics & bioinformatics	Study genetics basics and bioinformatics tools	Analyze genetic datasets and explain biological insights	6–12 months	Genetics courses, bioinformatics tutorials, research papers
Build a strong portfolio	Create real-world projects combining data science & genetics	5–7 completed projects published on GitHub	Ongoing	GitHub, Kaggle, mentorship from Digilians
Graduate from Digilians diploma	Complete coursework and final projects successfully	Diploma completion certificate	9 months	Digilians instructors, learning materials
Secure a professional role / Master's degree	Apply for jobs or Master's programs in genetics	Acceptance into a job or Master's program	1–2 years	LinkedIn, university websites, mentors
