State Finished

Completed on Sunday, 25 January 2026, 11:58 AM

Time taken 4 mins 29 secs

Marks 5.00/5.00

Grade 10.00 out of 10.00 (100%)

Question 1

Correct

Mark 1.00 out of 1.00

Logistic Regression is mainly used for:

- ☐ a. Predicting continuous values
- ☒ b. Predicting probabilities of discrete classes ✓
- ☐ c. Dimensionality reduction
- ☐ d. Feature scaling

Your answer is correct.

The correct answer is: Predicting probabilities of discrete classes

Question 2

Correct

Mark 1.00 out of 1.00

Which statement correctly differentiates **classification** from **regression**?

- ☐ a. Regression predicts discrete labels
- ☐ b. Classification predicts continuous values
- ☒ c. Classification predicts discrete class labels ✓
- ☐ d. Regression predicts probabilities only

Your answer is correct.

The correct answer is: Classification predicts discrete class labels

Question 3

Correct

Mark 1.00 out of 1.00

Which evaluation metric is **NOT suitable** for highly imbalanced datasets?

- ☒ a. Accuracy ✓
- ☐ b. F1-Score
- ☐ c. Recall
- ☐ d. Precision

Your answer is correct.

The correct answer is: Accuracy

Question 4

Correct

Mark 1.00 out of 1.00

A model outputs values strictly between **0 and 1** and uses a **threshold** to assign class labels. Which statement is TRUE?

- ☒ a. The model is performing probabilistic classification ✓
- ☐ b. The model cannot handle binary classification
- ☐ c. The model must be KNN
- ☐ d. The model minimizes Mean Squared Error

Your answer is correct.

The correct answer is: The model is performing probabilistic classification

Question 5

Correct

Mark 1.00 out of 1.00

Which statement about **training** is CORRECT?

- ☐ a. KNN requires gradient descent
- ☐ b. KNN minimizes cross-entropy loss
- ☒ c. Logistic regression requires parameter optimization ✓
- ☐ d. Logistic regression stores all training data

Your answer is correct.

The correct answer is: Logistic regression requires parameter optimization
