

# Presentation Outline

## Slide 1 — Title

- Project Title
- Team Members
- Course name

## Slide 2 — Problem Statement

- What problem are you solving?
- Why is it important?

## Slide 3 — System Overview

- The whole pipeline as a figure (e.g., system overview / flowchart / diagram)

## Slide 4 — Dataset used

- Dataset source
- Features
- Target variable
- Dataset size
- Sample of data

## Slide 5 — Data Preprocessing

- Missing values
- Encoding
- Normalization
- Feature selection

## Slide 6 — Model(s) Used

Example:

- Logistic Regression
- Decision Tree
- Random Forest
- Neural Network

## Slide 7 — Training Setup

- Train/test split

- Hyperparameters
- Tools used (Python, Scikit-learn, etc.)

## **Slide 8 — Results**

- Accuracy / Precision / Recall
- Confusion Matrix
- Comparison between models

## **Slide 9 — Insights**

- Key findings
- What worked best?

## **Slide 10 — Limitations**

- Dataset limitations
- Model weaknesses

## **Slide 11 — Future Work**

- Possible improvements
- More data / advanced models

## **Slide 12 — Individual work**

- List the contribution of each team member in the project
