

Final Report Structure

Project Title

Team Members

Name	Contribution

Link to project code and dataset: _____

1. Introduction

Problem description and motivation.

2. Related Work (optional but highly recommended)

Briefly mention similar ML/DL approaches or similar systems used in this problem.

3. Proposed system

Mention the proposed solution and the overall system overview (i.e., figure of all pipelines)

4. Dataset Description

Source, features, target variable.

5. Data Preprocessing

Cleaning, encoding, normalization.

6. Methodology

Algorithms used and justification.

7. Experimental Setup

Train/test split, hyperparameters.

8. Results

Tables, graphs, evaluation metrics.

9. Discussion

Interpretation of results.

10. Conclusion

Main findings.

11. Future Work

Possible improvements.

12. References
