

Freelancing Platforms Assignment

Building a Professional Freelance Identity

Student Name: Mohammed Eid Abdelmeguid

Specialization / Track: AI and Data Science — Digilians 9-Month Diploma

Background: AI and Data Science

1. Freelancing Platform Profiles — Links

Required platforms: Khamsat, MostaqI, Freelancer.com, Upwork, and one additional platform of choice. Two additional platforms were created (PeoplePerHour and Nafezly) in place of Freelancer.com.

Platform	Link	Status
Khamsat	khamsat.com/user/m0hammed_eid	Complete + service published
MostaqI	mostaqI.com/u/m0hammed_eid	Complete
Upwork	upwork.com/freelancers/~0111973d5edda9a8de	Complete
PeoplePerHour (extra)	peopleperhour.com/freelancer/mohammed-eid_abdelmeguid-ai-and-data-science-zxqjmazz	Complete
Nafezly (extra)	nafezly.com/u/m0hammedeid	Complete

Note: A Freelancer.com profile was not created for this submission. Khamsat, MostaqI, and Upwork (3 of the 4 required platforms) are complete, with two extra platforms added instead of one.

وصف الخدمة

هل سبق وتغزلت إلى ملف Excel مليء بالأرقام ولم تعرف من أين تبدأ؟ قبل فترة تواصل معي صاحب مشروع وكان لديه ملف مبيعات يحتوي على مئات العمليات اليومية. كان يعرف أن هناك مشكلة لكنه لم يكن يعرف أين بالضبط.

Service listing page for the published Khamsat service - an Excel sales dashboard service. Shows the service card (0 reviews so far, 2-day delivery), provider info (Mohammed Eid - AI Engineer, verified), and the service description.

نبذة عني

﴿ قُلْ إِنْ رَزَقْنِي رَبِّي لَأَبْنِ بِنَاءٍ وَيَعْمَلُ لَهُ وَمَا أَنْفَعُنِي فَن شَيْءٍ فُتُوْ يُخْلِقُهُ وَهُوَ خَيْرُ الْبَارِئِينَ ﴾ [سبأ: 39]

رأى أحمد في الزهد عن الحسن قال : " والله ، لقد أدركت أفواجا ، وصجيت غلوائف منهم ، ما كانوا يفزعون بشيء من الدنيا ، ولهمي كائن أخون في أغبيهم من هذا الطراب ، كان أحدهم يهش خمسين سنة لم يظلو له ثوب قطن ، ولا تصب له قنر ، ولا يحل زينة ويزين الأرض شيئا ، ولا أفز في بيته يصفق غلام قطن ، فإذا كان الليل : فقيام على أظفارهم ، يفركون وجوههم ، تجري دموعهم على خدودهم ، يُناجون ربهم في فكاك رقابهم ، كانوا إذا غموا الحسنة دأبوا في شكرها ، وسألوا الله أن يغفرها ، وإذا غموا السيئة أحزنهم ، وسألوا الله أن يغفرها ، فما زالوا كذلك على ذلك " .

تخيل أن لديك كميات كبيرة من البيانات، أرقام وتقارير ومعلومات تبدو متفرقة بلا معنى واضح. هنا يبدأ دوري.

أنا مهندس ذكاء اصطناعي ومحلل بيانات، أعمل على تحويل البيانات الخام إلى قصص مفهومة وقرارات قابلة للتنفيذ. أبحث داخل البيانات عن الأنماط الخفية، ثم أبني نماذج ذكية تستطيع التنبؤ بما قد يحدث مستقبلاً. وتساعد الشركات على اتخاذ قرارات أكثر دقة وفعالية.

ومع التطور السريع في الذكاء الاصطناعي التوليدي، لم يعد الأمر يقتصر على التحليل والتنبؤ فقط. فأنا أطور أنظمة ذكية تعتمد على نماذج اللغة الكبيرة (LLMs) وكلام الذكاء الاصطناعي (AI Agents) للاديين على فهم المهام المعقدة وتنفيذها تلقائياً، مما يوفر الوقت ويزيد من كفاءة العمل.

رحبني مع أي مشروع تبدأ بهم البيانات وتنظيفها واستخراج قيمتها الحقيقية، ثم بناء نماذج تعلم آلة دقيقة للتصنيف والتنبؤ. وعندما يتطلب الأمر حلولاً أكثر

Verified profile with job title 'AI Engineer', based in Egypt. Profile statistics (ratings, completed projects, response time) and a detailed bio describing experience turning raw data into AI-powered decisions, building predictive models and AI agents.

Profile: Mohammed Eid Abdelmeguid, title 'AI and Data Science', based in Cairo, Egypt, rate \$10/hr. Bio: Junior AI Engineer with a software engineering background (Python, REST APIs, Django) transitioning into AI/ML, currently completing a 9-month AI diploma.

2.5 Nafezly (Additional Platform)

[illegible]

Verified profile (Mohammed Eid) based in Egypt, with a professional bio describing experience as a data engineer transforming raw data into clear, actionable decisions and building AI agents.

3. Professional Portfolio

Portfolio hosted at: mohammed-eid.lovable.app — includes background, skills, experience, services, certifications, and the four featured projects below.

AI News Aggregator (In Progress)

RAG-Based Intelligent News Assistant

An NLP pipeline scrapes, embeds, and retrieves news articles via vector search, then a Retrieval-Augmented Generation (RAG) architecture with an LLM generates grounded, source-cited answers, alongside topic clustering on live feeds.

Tools/Technologies: Python, LangChain, FAISS, ChromaDB, HuggingFace, FastAPI

Link: github.com/M0hamed-Eid

Fitness Activity Tracker (Completed)

ML-Powered Exercise Classification

End-to-end ML pipeline classifying 5+ gym exercises from accelerometer/gyroscope sensor data, using feature engineering, outlier detection, and FFT-based frequency analysis. Compared Random Forest, Neural Network, and SVM models, achieving a ~15% accuracy lift over baseline.

Tools/Technologies: Python, Scikit-learn, Pandas, NumPy, Matplotlib

Link: github.com/M0hamed-Eid/FitnessTracker

StockGo Marketplace (Live)

Full-Stack E-Commerce for Construction Materials

Built a complete full-stack marketplace from scratch for construction and painting products: product listings, categories/subcategories, user and vendor management, backend REST APIs, an admin dashboard, and end-to-end business workflows — shipped as a real production platform.

Tools/Technologies: Django, Django REST Framework, JavaScript, PostgreSQL

Link: thestockgo.com/en

ADAS — Driver Assistance System (Completed)

Graduation Project, Grade A+ (Mentored by Valeo)

Embedded computer vision modules for automatic parking, lane keep assist, automatic emergency braking, and traffic sign detection — built as a graduation project mentored by Valeo and sponsored by EME.

Tools/Technologies: Computer Vision, OpenCV, Python, Embedded Systems

Link: —

4. Comparison Between Platforms

Platform	Audience	Strengths	Limitations
Khamsat	Arabic, Gulf/Egypt	Easy to set up a fixed-price service (gig); low competition for niche AI services	Smaller budgets; mostly local clients
MostaqI	Arabic region-wide	Good for proposal-based projects; strong trust system (ratings, ID verification)	Slower to get first project without reviews
Upwork	Global	Largest client base; hourly contracts; long-term relationships; higher rates	High competition; connects cost money; new accounts get less visibility
PeoplePerHour	Global (UK-leaning)	'Offers' format is good for selling a specific service package	Smaller AI/Data Science demand than Upwork
Nafezly	Arabic	Simple profile setup; good secondary presence	Smaller, less active marketplace

Overall takeaway: Khamsat and MostaqI are the best starting point for a beginner freelancer in the Arabic market — they have lower competition and a clear path to first reviews. Upwork has the strongest long-term earning potential for AI/Data Science work but requires more proposals before getting traction. PeoplePerHour and Nafezly are useful as secondary channels to increase visibility while the main effort stays on Khamsat, MostaqI, and Upwork.
